

Fear of COVID-19
keeps about 40% of heart attack
patients away from their doctors.¹

Chronic and acute heart disease **Don't wait until it's too late.**

Since the start of the pandemic, the mortality of heart attack patients and the number of mechanical complications have increased dramatically.² If you, or one of your relatives, experience any symptoms of a heart attack or notice a deterioration of your chronic heart condition, do not hesitate to immediately seek medical care.
